

nVenia ARPAC Brand SAL Model Horizontal Shrink Wrapper Discontinuation

March 18, 2022

As part of our ongoing process to review our product portfolio, we have decided to discontinue the manufacture of the ARPAC Brand SAL Model Horizontal Shrink Wrapper. This change is effective as of the date of this communication. We will continue to honor existing orders and as has always been our policy, we will continue to support existing equipment with repair parts and service to the extent possible, for as long as is practicable.

For customers looking for a continuous motion shrink wrapping machine capable of 100 or more packages per minute, we recommend you consider our SAL model, which comes with the preferred Allen-Bradley control platform.

We appreciate your ongoing business and understanding as we undergo this transition.

If you have any questions regarding this product notification or other questions regarding our Product End of Life Policy, please contact your SupportPro representative at 847-777-8776.
