

### Intermittent Motion Shrink Bundler

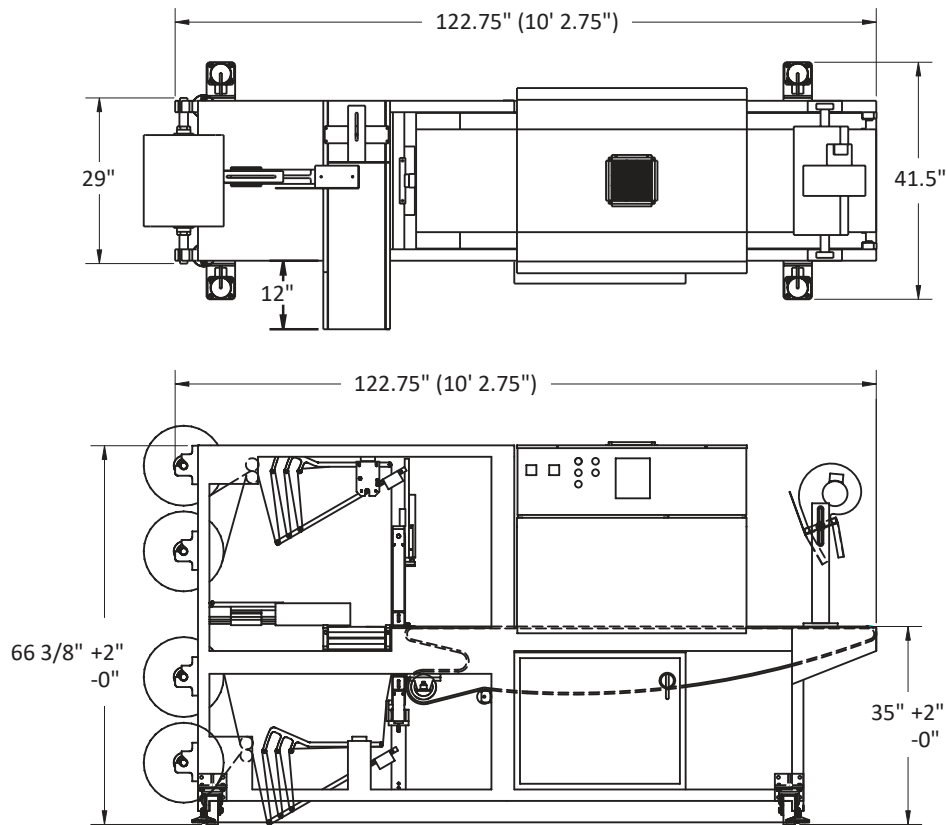

Our ARPAC Brand 708HB Model is a right-angle, intermittent motion shrink bundler designed specifically for today's pharmaceutical, health and beauty industries.

Ultra-compact in design and economical in price, the 709HB Model is capable of shrink wrapping up to 20 bundles per minute in a single lane configuration. This model uses motorized pulleys rather than separate drives an chain,. This allows for clean, safe operation and a slim machine frame.
