

Vertical Stretch Hood Film Cover System

The nVenia Stretch Hooder machine stands as the optimal solution for pallet covering requirements. Through specialized techniques, it delivers ultimate protection for palletized products, ensuring their safe and secure transport. Unaffected by temperature variations, humidity, static film, or inferior pallet quality, the nVenia Stretch Hooder reliably secures the load, safeguarding your goods during transportation.

APPLICATIONS

- Automotive
- Beverage
- Building Supplies
- Consumer Goods
- Contract Packaging
- Food
- Health & Beauty
- Material Handling
- Printing & Publishing

FEATURES

- Automatically adjusts to accommodate various pallet sizes
- Achieves a 20% reduction in film usage through vertical stretching
- Utilizes mechanical opening of Stretch Hood film (non-vacuum method)
- Incorporates automatic pallet height measurement
- Features maintenance-free tension arms
- Pallet support is entirely driven by roller conveyors
- Easily expandable with additional foil rolls for different pallet sizes
- Offers separate automatic tension arm correction
- Frequency-controlled tension arms, individually adjustable
- User-friendly operation
- Includes 500 adjustable menu options
- Requires minimal maintenance
- Equipped with Ethernet connection and Wi-Fi capabilities

OPTIONS

- Several film rolls (different type or size of the film)
- Pallet correction within machine or at infeed position
- Unit for creating de-aeration (warm products)

SPECIFICATIONS

- Capacity: 100 Pallets/hour
- Electrical: 460V, 3Ph, 60Hz

Pallet sizes*

- Standard: 48"x32"
- Industrial: GMA & CHEP 40"x48"

* not limited to U.S. pallets
