

FOOD & BEVERAGE  
PACKAGING SOLUTIONS

**NVENIA**

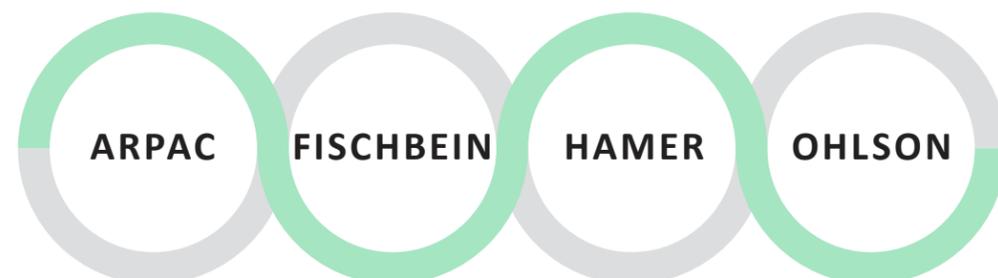

A DURAVANT COMPANY

# High Performance Packaging Solutions for Food and Beverage Products

nVenia concepts, design, manufactures, integrates, installs and services equipment custom-designed for your specific food or beverage packaging challenge. We provide complete primary, secondary and end-of-line packaging solutions that are built-to-last, deliver maximum up-time and provide unique branding opportunities for your product.

## The nVenia Family of Brands

nVenia brings Duravant packaging leaders Arpac, Hamer-Fischbein and Ohlson Packaging together to create next-level packaging equipment integration and innovation.

One name, in one location, with one shared focus: our customers and the problems they need to solve.

## Stronger. Together.

With primary, secondary, and end-of-line packaging now under one roof, nVenia can fully integrate your entire food and beverage packaging line. From raw product to a wrapped pallet ready for shipment, our one-stop shop offers the easiest route from concept to creation with the lowest total cost of ownership.

# Primary Packaging

Our primary packaging capabilities allow for automatic or semi-automatic weighing, counting, and filling into a variety of both rigid and flexible food container formats. We also have industrial bagging automation expertise, ensuring your product is filled and sealed to your specifications.

# nVenia is your single-source for all your food and beverage packaging equipment needs

"Arpac brand keep doing what you're already doing – great service, people, and machines."

Maintenance Mechanic  
Algod Foods

"Hamer brand solutions were the fastest, least expensive way to add 10-20% additional production to our plant and save overtime costs."

Owner  
Serv-Ice Packaged Ice

"One word I use to describe Fischbein brand equipment is 'durable.' That's how you lead the market for 100 years. We're still servicing Fischbein machines that are 30 years old."

International Distributor  
of Packaging Machinery

"Ohlson brand equipment provided unique engineered solutions to my packaging problems.... The process is smooth and machine operation is reliable."

Vice President  
Aurora Products

# Secondary Packaging

nVenia's secondary packaging capabilities allow for a seamless transition from your primary packaging to "ready to ship!" Ranging from intermittent to continuous motion machines our robust designs give you the lowest total cost of ownership.

## PRODUCT WE PACKAGE

# End-of-Line Packaging

Our palletizing and stretch wrapping equipment can be seamlessly integrated into one end-of-line packaging solution. Our robots fit into small footprints, can be equipped with a wide range of end-of-arm tools, and are a flexible solution. Our conventional palletizers are robust, fast, and built to last. When you couple our extensive stretch wrapping portfolio with our palletizing capabilities, you have a complete packaging solution for your food and beverage products.

## EQUIPMENT

- Stretch Wrappers
- Conventional Palletizers
- Robotic Palletizers

## Our Commitment to Our Customers

At nVenia, we know the power of a great company lies in its ability to delight their customers. That is our number one focus. From your first consultation to start-up, we will be with you every step of the way. Our promise to deliver an excellent customer experience is built on:

- Responsiveness
- Attention to Detail
- Communication
- Quality
- Collaboration
- Partnership

Our commitment doesn't end there - Our Lifecycle Services team ensures comprehensive support throughout the entire life of your equipment. Through Duravant Lifecycle Services, nVenia customers gain access to the collective power of Duravant, including global reach and financial strength.

nVenia is fully committed to delivering an unparalleled customer experience - now and always.
